Course Objectives	To enable students to cultivate ethical awareness, emotional intelligence, responsible behaviour, professional integrity, and harmonious interpersonal relationships through practical discussions and real-life examples.
Prerequisite Knowledge	No specific prerequisite knowledge is required for this course. Students from any engineering branch can join. Basic proficiency in English and an open mindset to participate in discussions and self-reflection activities will be beneficial.
Course Description	This course aims to develop ethical awareness, emotional intelligence, and responsible behaviour among engineering students. It bridges the gap between technical education and human values by helping students understand the importance of ethics in personal life, professional career, society, and the environment. Through interactive sessions, real-life case studies, and reflective activities, the course encourages students to become not only competent engineers but also responsible and compassionate individuals.
Course Outcomes	**Upon completion of the course, students will be able to (Please correlate 05 Co's with 05 Units).** 1. Understand the significance of human values, self-awareness, and emotional well-being in personal and professional life 2. Understand the significance of human values, self-awareness, and emotional well-being in personal and professional life 3. Apply professional ethics, teamwork, accountability, and integrity in academic and workplace settings. 4. Recognise and fulfil their social, environmental, and civic responsibilities as responsible citizens and professionals. 5. Develop effective decision-making, communication, and life-management skills for a balanced and ethical life.
